

Residential Customer Fact Sheet

What is the CoolSaver A/C Tune-Up?

The CoolSaver A/C Tune-Up provides SWEPCO Arkansas residential customers with high-performance tune-ups on existing A/C and heat pump systems. During the tune-up, the contractor cleans the system equipment and corrects any inefficiencies. This improves performance and saves energy.

What are the Benefits?

- Rebates in the form of an instant discount off your tune-up
- Lower monthly utility bills
- Can extend the life of your system
- Your home is more comfortable

What are the Rebates?

- \$150 per tune-up
 - » 3 ton – 5 ton unit
- \$75 per tune-up
 - » 1.5 ton – 2.5 ton unit

Who is Eligible for a CoolSaver Tune-Up?

All SWEPCO residential customers in Arkansas with a central A/C or heat pump systems of five tons or less that is at least a year old.

How to Participate:

- 1** Contact your local SWEPCO Arkansas Energy Advisor at the phone number or email address below to discuss any questions and to get paired up with a participating contractor.
- 2** A participating CoolSaver contractor will conduct an evaluation of your existing equipment to determine if a CoolSaver Tune-up would help your air conditioner or heat pump.
- 3** The contractor will complete the CoolSaver Tune-Up of your system, which can include: checking filters, thoroughly cleaning the condenser coil, evaporator coil, blower, adjusting air flow, and adjusting the system refrigerant charge.
- 4** Rebates in the form of instant discounts are applied to your final invoice.

Please contact your local SWEPCO Energy Advisor, Jacob Nielson, at **479-439-8627** or jacob.nielson@clearResult.com for more information or to discuss any questions.
