

## With SWEPCO, being energy smart is easy.

**SWEPCO Louisiana's Large Commercial and Industrial Solutions Program provides incentives for qualifying energy-efficient upgrades to commercial and industrial facilities.**

### Participation is Easy

#### Step 1: Identify Eligible Projects

- Contact us to verify availability of incentives, schedule a walkthrough assessment and identify viable energy efficiency improvements

#### Step 2: Submit Application and Reserve Incentive

- After the assessment, we'll provide you with an application that includes a description of the proposed project, estimated kWh savings, a measurement and verification plan, and the incentive reservation request.

#### Step 3: Implement Project, Measure and Verify Savings

- After receiving your application, a Program Energy Advisor will conduct a pre-installation inspection and send a notice to proceed with implementing the project.

#### Step 4: Complete a Post-Installation Inspection

- After installation is complete, Program Staff will conduct a post installation inspection prior to processing incentives.

#### Step 5: Receive Your Incentive

- The final incentive amount will be calculated based on the project type, tier level cap, and the verified kWh achieved by the project. Custom and refrigeration projects are eligible for incentives of \$0.08 per kWh saved, lighting projects are eligible for incentives of \$0.10 per kWh saved and HVAC projects are eligible for \$0.15 per kWh saved. Incentives are capped at \$30,000 per project and incentive checks will be mailed within 3-4 weeks of project verification by SWEPCO.

### Customer Eligibility

- Incentives are available to SWEPCO served commercial and industrial facilities with a demand over 100kW.

### Typical Projects for Existing and New Construction

- Air Compressors
- Variable Speed Drives - Fans, Motors, Pumps
- Lighting Upgrades
- Premium Efficiency Motors
- Refrigeration - Door Controls, Fan Controls, ECM upgrades
- HVAC Upgrades

**Submit an application and reserve your incentive at [SWEPCOgridSMART.com](http://SWEPCOgridSMART.com)**
